EXPERIMENT 4

NAME: DEVISHREE J **ROLLNO:240701702**

Create a prototype with familiar and unfamiliar navigation elements. Evaluate ease of use with different user groups using proto.io

Theme Park Ticket Booking Application

Screen 1: Welcome Screen

Familiar Elements:

1. **Start / Book Tickets Button**
   - A standard call-to-action button used in most apps.

- Clicking it moves the user to the next screen.

2. **Title Text ("Welcome to Wonder Park")**
   - Clearly identifies the app purpose.

Unfamiliar Element:

1. **Full-Screen Clickable Background**
   - Instead of only using the button, the entire background image is tappable to continue.
   - This is not commonly used in all apps and may confuse first-time users.

Screen 2: Ticket Selection Page

Familiar Elements:

1. **Ticket Type Cards (Adult / Child / Family)**
   - Common card-based selection layout.
2. **Next Button**
   - Used to proceed to the next step.

Unfamiliar Element:

1. **Swipe to Select Ticket**

- Instead of clicking buttons, users swipe horizontally to change ticket type.
- This is less traditional compared to standard selection buttons.

Screen 3: Date Selection Page

Familiar Elements:

1. **Calendar Layout**
   - Common UI used in booking applications.
2. **Highlighted Selected Date**
   - Standard visual feedback.

Unfamiliar Element:

1. **Circular Date Selection Animation**
   - Instead of a simple square highlight, the date appears inside an animated circle.
   - Slightly different from traditional calendar design.

Screen 4: Payment Summary Page

Familiar Elements:

1. **Total Amount Display**
   - Clearly shows payable amount.
2. **Pay Now Button**
   - Standard payment confirmation button.

Unfamiliar Element:

1. **Floating Circular Pay Button**
   - Instead of a rectangular button at the bottom, payment is triggered using a floating circular button.
   - This differs from common payment page layouts

Screen 5: Confirmation Page

Familiar Elements:

1. **“Booking Confirmed” Message**
   - Standard success message.
2. **QR Code**
   - Commonly used for entry verification.

Unfamiliar Element:

1. **Auto-Confetti Animation Triggered by Screen Tap**
   - Confetti animation appears when user taps anywhere on screen.
   - Not typical in standard confirmation pages.
